

## Cardiomedics' *CardiAssess & ECP* Training Program and Agenda

Cardiomedics training program is a 2 day training program held at the home office located in Irvine, California. There will be one accredited training program per facility offered by Cardiomedics.

It is very important that you choose the most appropriate "Lead" Technician or Nurse who will be certified after attending and passing our training program. They will then be qualified to train the additional personnel at your site. Each facility is allowed to send one person per system purchased. Should you require training of a new lead technician we would require that you send that person for training at your expense.

In order to maximize the learning process, class size is limited to 5 persons. Arrival and departure will depend on which training class(es) you will be attending. You will arrive on the afternoon or evening of the day prior to training and will depart on a flight that would be most convenient depending on what part of the country you are from.

Cardiomedics will cover your airfare, hotel and provide a reimbursement for evening meals. Each trainee may stay over the weekend and is welcome to continue their stay at the Ayres Hotel & Suites in Newport Beach at your own expense. Spouses may accompany you to Southern California and stay with you but you will be responsible for any additional expenses that they may incur.

**Re-Training for our existing ECP providers will incur a re-training fee of \$1000 plus your travel expenses. If your company decides to have the Cardiomedics trainer come to your facility for re-training, your facility will be responsible for a \$3000 training fee.**

**Please choose from the following *CardiAssess/ECP* training dates:  
(Input your choice on the registration form) Please contact our training department for updated training dates and availability.**
